

Whether your business is **big** or **small**, we can help add **green** to your bottom line.

Through the Connecticut Energy Efficiency Fund, UI has programs to help every size business become energy efficient and helps any business be more productive and reduce operating costs.

Is your business growing out of its current space?

The Energy Conscious Blueprint program will pay you cash incentives when you build energy-efficient measures into your new facility or addition. Plus, you'll realize the additional benefits of a facility with more comfortable work environments, better operational efficiency and lower operating costs—all leading to a bigger bottom line.

Are you looking for ways to become more efficient?

The Energy Opportunities program will pay you cash incentives for retrofitting your existing facility with energy-efficient measures. You know that introducing energy-efficient technology into your company will help reduce your energy bills, but the initial cost may be too much for you to manage. Energy Opportunities was designed to help you manage those initial implementation costs so you can realize the energy savings.

Are you looking for ways your small business can have big profits?

Running a successful small business means taking every advantage you can get. That's why the Small Business Energy Advantage program pays you cash incentives for lowering your energy use. It's virtually risk-free and easy to get started.

For more information on these programs call **1-877-WISE USE** or email ci@uinet.com, use code CEP29BC in the subject line for faster service.
